1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The Title has been changed to: --Method of Manufacturing Fine Metal Particles--.

3. The following is an examiner's statement of reasons for allowance:

a) Instant claim 1 appears to be identical to claim 1 of the parent application (10/106,646) as amended on 10/13/2003. That claim was rejected under 35 USC 112 in the parent application. Upon filing of the present continuation-in-part (CIP) application, literal support exists for claim 1 and therefore no rejection under 35 USC 112 will be made.

b) The prior art does not disclose or suggest a process as claimed, including the steps of mixing a dispersion medium with a particle coalescence preventing agent as defined in claim 1, mixing a metal including at least 10% tin but excluding alkali metals with the dispersion medium, heating to melt the metal, applying a dispersing energy to obtain a molten metal particle-dispersed substance, and cooling to solidify the molten metal and form solid particles having an average particle diameter of 15  $\mu$ m or less.

c) With respect to some of the prior art used to reject the claims of the parent application, the Watson patent clearly requires the presence of alkali metals, and the Ochiai process results in particles significantly larger than the maximum size presently claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1742

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Some prior art has been crossed out on the attached PTO-1449 form because the document numbers do not match the actual documents cited. The correct citations have been provided on the attached PTO-892 form.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Wyszomierski whose telephone number is (571) 272-1252. The examiner can normally be reached on Monday thru Friday from 8:00 a.m. to 4:30 p.m. Eastern time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King, can be reached on (571) 272-1244. All patent application related correspondence transmitted by facsimile must be directed to the new central facsimile number, (571)-273-8300. This new Central FAX Number is the result of relocating the Central FAX server to the Office's Alexandria, Virginia campus.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
